

DHANESHWARI NERTI

AWS DevOps Engineer | Kubernetes, CI/CD, Infrastructure Automation & Monitoring
+91 9741750604 | daneshwarinerti0604@gmail.com | Bagalkot / Gadag, Karnataka | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

DevOps/Cloud Engineer with hands-on experience deploying and monitoring containerized workloads on AWS EKS, building CI/CD pipelines with GitHub Actions and Jenkins, and provisioning AWS infrastructure through Terraform. Skilled in Docker and Kubernetes, using Helm to deploy and manage Kubernetes monitoring components including Prometheus, Grafana, and Alertmanager. Experienced with core AWS services (EC2, VPC, IAM, S3, ECR, EKS, ECS Fargate, RDS, ALB) for cloud architecture, and working knowledge of GitOps fundamentals and DevSecOps fundamentals, including CI/CD security gates and secrets management. Gained additional infrastructure experience through a client-facing internship supporting AMD. Seeking an AWS DevOps Engineer / Cloud Engineer / Junior DevOps Engineer role.

TECHNICAL SKILLS

AWS: EC2, VPC, IAM, S3, EBS, ECR, EKS, ECS Fargate, RDS, ElastiCache, ALB, NLB, Lambda, Route 53, CloudWatch, Auto Scaling, Security Groups, CloudFormation, AWS CLI

Containers & Orchestration: Docker, Docker Compose, Kubernetes, Helm, kubectl, Kubernetes Ingress, Kubernetes Services, YAML

Configuration Management: Ansible

CI/CD: Jenkins, GitHub Actions, AWS CodeCommit, AWS CodeBuild, AWS CodeDeploy, AWS CodePipeline

Infrastructure as Code: Terraform, AWS CloudFormation

Monitoring & Observability: Prometheus, Grafana, Alertmanager

GitOps: GitOps Fundamentals, Argo CD — Basic Knowledge

DevSecOps: DevSecOps Fundamentals, Trivy, Gitleaks, pip-audit, Secrets Management, IAM Least Privilege

OS & Scripting: Linux, Bash/Shell Scripting, Python

Version Control & Networking: Git, GitHub, TCP/IP, DNS, DHCP, Routing & Switching

Databases: Amazon RDS

INTERNSHIP / WORK EXPERIENCE

Network & Cloud Engineering Intern — Infobellit (Client: AMD)

Jan 2026 - May 2026

Bengaluru, India

- Automated AWS infrastructure provisioning using Terraform, defining VPCs, EC2 instances, and Security Groups as reusable, version-controlled modules.
- Built CI/CD pipelines with AWS CodeCommit, CodeBuild, and CodeDeploy to automate build, test, and deployment stages.
- Containerized application workloads using Docker and managed pod orchestration with core Kubernetes objects.
- Automated recurring operational tasks using Ansible playbooks, Shell scripting, and Linux administration.

PROJECTS

Microservice Health Monitoring System | Amazon EKS, Docker, Helm, ECR, ALB Ingress, EBS, Prometheus/Grafana/Alertmanager, GitHub Actions

- Containerized and deployed a multi-service workload on Amazon EKS using Docker and Amazon ECR.
- Used Helm to deploy and manage Kubernetes components, including Prometheus, Grafana, and Alertmanager for monitoring and observability.
- Configured AWS ALB Ingress, Kubernetes ClusterIP Services, and Amazon EBS-backed persistent storage.
- Automated container builds and EKS deployments through GitHub Actions.

AWS Voting App | Terraform, Docker, Docker Compose, ECS Fargate, ECR, RDS PostgreSQL, ElastiCache Redis, Secrets Manager, GitHub Actions

- Architected and provisioned a multi-tier AWS environment (ECS Fargate, RDS, ElastiCache) entirely through Terraform for repeatable, version-controlled infrastructure.
- Used Docker Compose for local multi-container development and testing before deploying services to ECS Fargate via a GitHub Actions pipeline that automated image builds and ECR pushes.
- Used AWS Secrets Manager to eliminate hardcoded credentials and centralize secret management.

DevSecOps CI/CD Pipeline | GitHub Actions, Docker, AWS ECR, ECS Fargate, ALB, Trivy, Gitleaks, pip-audit

- Built a GitHub Actions pipeline for a Flask application: Docker build, ECR push, ECS Fargate deployment behind an ALB.
- Integrated automated security gates — Trivy (container scanning), Gitleaks (secret detection), pip-audit (dependency auditing) — blocking builds on failed checks.
- Applied shift-left security practice by embedding vulnerability checks directly into the CI stage.

CERTIFICATIONS

- AWS (Basic to Intermediate Level) — 12-Day Workshop, Algo Tutor
- Introduction to Python — SoloLearn (2025)

ACHIEVEMENTS

- Completed a client-facing DevOps/cloud engineering internship with Infobellit for AMD, delivering CI/CD, IaC, and containerization work in a real engagement.
- Independently deployed and configured Prometheus and Grafana monitoring on an Amazon EKS environment.

EDUCATION

Bachelor of Engineering (B.E.) in Information Science and Engineering

2022 - 2026

Basaveshwara Engineering College, Bagalkot | CGPA: 8.54/10

Pre-University Education (PCMB)

2020 - 2022

Department of Pre-University Education, Karnataka | 95.5%

SSLC

2020

Karnataka Secondary Education Examination Board | 89.9%
